# SALIDO COMPLETES FIRST WEST COAST INSTALLATION

**NEW YORK – (May 31, 2016) –** SALIDO, the leading restaurant operating system, announced today that it has completed its first installation in the west coast with the recently opened by CHLOE. at the 365 by Whole Foods Market in Silver Lake, Calif. This also marks SALIDO's first installation outside of New York.

In March 2016 SALIDO first announced its partnership with ESquared Hospitality and Chef Chloe Coscarelli to use a part of its rOS – the innovative kitchen supply management system for kitchen inventory, recipe and ingredient management, invoice processing and additional functions. The easy-to-scale system aids in a company's expansion as owners utilize a cloud-based dashboard to view their operations. As such, the ESquared team is able to see real-time data on Los Angeles operations from the New York headquarters and vice versa.

"This is a big moment for SALIDO as we've expanded outside of the New York market and are now showcasing the rOS in Los Angeles," said SALIDO Founder and CEO Shu Chowdhury. "We're grateful for partners like ESquared and by CHLOE. and the opportunities to support their growth, no matter where in the country."

Next for SALIDO and by CHLOE. include the installations at the New York SoHo, West Village and Flatiron locations as well as Boston's Seaport.

**About SALIDO**

SALIDO powers the future of restaurant operations. Using one interconnected system, SALIDO lets a restaurant focus on what drives its core business: the customer experience, called the restaurant operating system, rOS. The SALIDO rOS empowers businesses to control, analyze and leverage their critical data. SALIDO collects comprehensive customer profiles, including party size, spend, branded products, payment time, and more. www.salido.com.
